

Jisan Hoque Gayen

Full-Stack Developer | MERN Stack

jisangayen@gmail.com | +91 9732386292 | Bangalore, Karnataka, India | [linkedin.com/in/linkedin/jisangayen](https://www.linkedin.com/in/linkedin/jisangayen) | jisan.in | github.com/jisangayen

Summary

Software Developer with 2+ years of experience in building scalable, end-to-end applications. Proficient in React.js for responsive web interfaces and React Native with Expo for cross-platform mobile development. Strong expertise in backend architecture, secure API design, and database optimization. Focused on writing clean, maintainable code and delivering high-performance, user-centric solutions

Skills

Frontend:- • React.js • React Native • JavaScript (ES6+) • TypeScript • HTML5 • CSS3 • Tailwind CSS • Redux Toolkit • React Query • React Router • Axios • Responsive Web Design

Backend:- • Node.js • Express.js • RESTful APIs • JWT Authentication • Socket.IO • MVC Architecture • Middleware Development • API Integration • Authentication & Authorization

Database:- • MongoDB • Mongoose • Database Design • CRUD Operations

DevOps & Cloud:- • Docker • Docker Compose • CI/CD (GitHub Actions) • Vercel • Render • Netlify • Cloudinary

Tools & Technologies:- • Git • GitHub • Postman • VS Code • Figma

Testing:- • Jest • React Testing Library • Postman API Testing

Core Concepts:- • Component-Based Architecture • State Management • Responsive Design • REST API Design • Performance Optimization • Error Handling • Clean Code Principles

Work Experience

Mobile Development (React Native & Expo)

Ausumn Team Online Services Pvt. Ltd | Bangalore, Karnataka, IND Aug 2024 - Present

- Cross-Platform Architecture: Built cross-platform mobile applications using React Native and Expo with reusable component architecture
- Performance Optimization: Delivered responsive layouts and optimized assets to ensure smooth 60fps performance and fast load times on both iOS and Android devices.
- Native Integration: Implemented mobile-specific UI patterns and integrated frontend screens with backend REST APIs for consistent data synchronization.

Web Development (React & MERN) [Link](#)

Ausumn Team Online Services Pvt. Ltd | Bangalore, Karnataka, IND Aug 2024 - Present

- Feature Engineering: Developed and maintained end-to-end full-stack features for the live production platform, focusing on enhancing application scalability and performance.
- Admin Ecosystem: Architected a comprehensive Admin Dashboard to streamline platform operations, enabling centralized management of users, property listings, and system analytics.
- Advanced Search & Discovery: Built a sophisticated property search and filtering engine, allowing users to query the database using multiple criteria for a personalized experience.
- UI/UX Excellence: Utilized Tailwind CSS to build highly responsive, pixel-perfect web interfaces that ensure a seamless experience across all desktop and mobile browsers.

Backend & Real-Time Systems

Ausumn Team Online Services Pvt. Ltd | Bangalore, Karnataka, IND

Aug 2024 - Present

- Real-Time Communication: Developed a low-latency Chatbot system using Socket.IO, facilitating instant, bidirectional communication between users and the platform with live message updates.
- Security & Auth: Implemented robust user authentication and authorization flows (Sign Up/Sign In) featuring secure credential handling and server-side validation.
- API & Database Design: Designed and integrated RESTful APIs with Node.js/Express, optimizing data flow between the client-side and MongoDB for high-concurrency environments.
- Listing Management: Built complex CRUD modules for property and project management, empowering both admins and users to manage listings with high efficiency.

Education

B-Tech in Computer Science and Engineering | CGPA - 7.9

Mar 2021 - Jul 2024

Meghnad Saha Institute of Technology, Kolkata, WB, IND

Diploma in Computer Science and Engineering | CGPA - 7.9

Mar 2018 - Jul 2021

Contai Polytechnic, Kolkata, WB, IND

Certifications and Training

MERN Full Stack Web Development Training | Apna College

[View Certificate](#)

Project Experience

Doctor Appointment Booking System | [Live Demo](#) | [GitHub](#)

A full-stack web application that enables users to securely register, log in, filters for doctors, and book appointments through an intuitive and responsive interface.

Key Contributions:-

- Developed a secure appointment booking platform using the MERN stack, enabling seamless doctor appointment scheduling and management.
- Implemented JWT-based authentication and authorization to provide secure user access and protect sensitive data.
- Designed and integrated RESTful APIs with Node.js, Express.js, and MongoDB for efficient data management and smooth client-server communication.
- Built a fully responsive and modern user interface using React.js and Tailwind CSS, ensuring an optimal experience across desktop and mobile devices.
- Implemented complete CRUD functionality for appointment management, user profiles, and doctor information.
- Applied reusable React components and state management techniques to improve maintainability and scalability.
- Integrated form validation, error handling, and user-friendly notifications to enhance the overall user experience.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, Tailwind CSS, REST APIs, Git, GitHub, Postman, VS Code.
