

Jisan Hoque Gayen

Full-Stack Developer | MERN Stack Developer

Bangalore, Karnataka, India | jisangayen@gmail.com | +91 9732386292 | linkedin.com/in/jisangayen | jisan.in | github.com/jisangayen

SUMMARY

Full Stack Developer with 2+ years of experience building and maintaining production web applications using the MERN stack, including a real estate platform. Proficient in **React.js**, **React Native (Expo)**, **Node.js**, **Express.js**, and **MongoDB**, with hands-on experience developing **REST APIs**, **real-time features using Socket.IO**, secure authentication, and admin dashboards. Experienced in building responsive, scalable applications with clean, maintainable code and a focus on performance and user experience.

TECHNICAL SKILLS

Language: JavaScript (ES6+), TypeScript (Also familiar with: Python, Java (core language concepts))

Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS, Redux Toolkit, React Query, React Router, Axios, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Socket.IO, MVC Architecture, Middleware Development, API Integration, Authentication & Authorization

Database: MongoDB, Mongoose, Database Design, CRUD Operations

Tools & Technologies: Git, GitHub, Postman, VS Code, AI Tools

Ai Tools: ChatGPT, Google Gemini, GitHub Copilot, Claude, AI-assisted Coding & Debugging

Core Concepts: Component-Based Architecture, State Management, Responsive Design, REST API Design, Performance Optimization, Error Handling, Clean Code Principles

EXPERIENCE

Software Developer (*Mobile & Web Development*)

Aug 2024 - Present

Ausumn Team Online Services Pvt. Ltd([RoofExplore](#)) | Bangalore, Karnataka, IND

- Optimized and maintained a scalable MERN stack web application (**React.js**, **Node.js**, **Express.js**, **MongoDB**) for a production real estate listing platform.
- Designed and integrated secure **RESTful APIs with JWT-based authentication and authorization**, and optimized database operations for reliable backend performance.
- Built a comprehensive **Admin Dashboard** to manage users, property listings, and platform operations through a centralized interface.
- Engineered advanced property search, filtering, and **CRUD functionality**, improving data management and overall user experience.
- Integrated real-time communication using **Socket.IO**, enabling live updates across the admin dashboard without manual page refreshes.
- Built responsive, reusable, pixel-perfect user interfaces with React.js and Tailwind CSS, ensuring cross-browser compatibility.
- Designed mobile-specific UI patterns and integrated frontend screens with backend **REST APIs** for consistent data synchronization across web and mobile.
- Collaborated with cross-functional teams to gather requirements, troubleshoot production issues, and deliver new features within project timelines.

PERSONAL PROJECTS

Doctor Appointment Booking System

[Live Demo](#) | [GitHub](#)

A full-stack web application that enables users to securely register, log in, filters for doctors, and book appointments through an intuitive and responsive interface.

Key Contributions:

- Configured a secure appointment booking platform using the MERN stack, enabling seamless doctor appointment scheduling and management.
- Built **JWT-based authentication and authorization** to provide secure user access and protect sensitive data.
- Designed and integrated **RESTful APIs with Node.js, Express.js, and MongoDB** for efficient data management and smooth client-server communication.
- Built a fully **responsive** and modern user interface using **React.js and Tailwind CSS**, ensuring an optimal experience across desktop and mobile devices.

Tech Stack: React.js, TypeScript, Node.js, Express.js, MongoDB, Mongoose, JWT, Tailwind CSS, REST APIs, Git, GitHub, Postman, Jest, VS Code.

Guard Tracking System

[Live Demo](#) | [GitHub](#)

A real-time workforce management platform enabling GPS-based attendance, live guard tracking, automated work-hour calculation, and role-based administration.

Key Contributions:

- **Developed a full-stack Guard Tracking & Attendance Management System** using React.js, Node.js, Express.js, Express, and MongoDB with **JWT-based role authentication**, enabling secure access for Admin and Guard users through role-based authorization.
- **Implemented GPS-based check-in/check-out** using the Browser Geolocation API and Google Maps integration, capturing real-time location, login/logout timestamps, and automatically calculating working hours with accurate attendance records.
- **Integrated Socket.IO for real-time communication**, instantly pushing guard login, logout, attendance updates, and status changes to the Admin Dashboard without page refresh, improving operational visibility and response time.
- **Built a feature-rich Admin Dashboard** with live guard monitoring, attendance history, monthly reports, advanced search, filtering, and interactive analytics using Recharts for real-time workforce tracking and reporting.

Tech Stack: React.js, TypeScript, Node.js, Express.js, MongoDB, Socket.io, JWT, Tailwind CSS, REST APIs, Git, GitHub, Postman, VS Code.

EDUCATION

B-Tech in Computer Science and Engineering

CGPA - 7.9

Mar 2021 - Jul 2024

Meghnad Saha Institute of Technology, Kolkata, WB, IND
